CONTENTS

No. 1, September 20, 1943

PAGE

Ponder, Eric. The mechanism of the inhibition of hemolysis..... 1

Fan, C. S., Stauffer, J. F., and Umbreit, W. W. An experimental separation of oxygen liberation from carbon dioxide fixation in photosynthesis by *Chlorella*..... 15

Walker, Paul Andrew. Physical properties of the allantoic and amniotic fluids of the chick. III. Surface tension..... 29

Goldman, David E. Potential, impedance, and rectification in membranes..... 37

Osterhout, W. J. V. Nature of the action current in *Nitella*. V. Partial response and the all-or-none law. Plate 1..... 61

No. 2, November 20, 1943

Anderson, Rubert S., and Harrison, Bernice. The quantitative effect of x-rays on ascorbic acid in simple solution and in mixtures of naturally occurring compounds..... 69

Carr, Charles W., and Sollner, Karl. The structure of the collodion membrane and its electrical behavior. VII. Water uptake and swelling of collodion membranes in water and solutions of strong inorganic electrolytes..... 77

Osterhout, W. J. V. A model of the potassium effect..... 91

Clark, Janet H. Denaturation changes in egg albumin with urea, radiation, and heat..... 101

Schwartz, Boris. The effect of temperature on the rate of hydrolysis of triglycerides by pancreatic lipase..... 113

Crozier, W. J., and Wolf, Ernst. Theory and measurement of visual mechanisms. IX. Flicker relations within the fovea..... 119

Osterhout, W. J. V. Studies of the inner and outer protoplasmic surfaces of large plant cells. I. Plasmolysis due to salts..... 139

No. 3, January 20, 1944

Shock, Nathan W. Homeostatic adjustments after exercise. I. Acid-base equilibrium of the blood..... 143

Morales, Manuel F., and Shock, Nathan W. A physical theory of acid anion displacement and recovery following exercise..... 155

Powers, Wendell H., Lewis, Stanley, and Dawson, Charles R. The preparation and properties of highly purified ascorbic acid oxidase..... 167

PAGE

POWERS, WENDELL H., and DAWSON, CHARLES R. On the inactivation of ascorbic acid oxidase 181

LAWRENCE, A. S. C., NEEDHAM, JOSEPH, and SHEN, SHIH-CHANG. Studies on the anomalous viscosity and flow-birefringence of protein solutions. I. General behavior of proteins subjected to shear 201

LAWRENCE, A. S. C., MIALL, MARGARET, NEEDHAM, JOSEPH, and SHEN, SHIH-CHANG. Studies on the anomalous viscosity and flow-birefringence of protein solutions. II. On dilute solutions of proteins from embryonic and other tissues 233

No. 4, MARCH 20, 1944

PONDER, ERIC. The osmotic behavior of crenated red cells 273

CROZIER, W. J., and WOLF, ERNST. Theory and measurement of visual mechanisms. X. Modifications of the flicker response contour, and the significance of the avian pecten 287

CROZIER, W. J., and WOLF, ERNST. Flicker response contours for the sparrow, and the theory of the avian pecten 315

CRAIG, FRANCIS N. The effect of carbon dioxide tension on the metabolism of cerebral cortex and medulla oblongata 325

FENNELL, RICHARD A. I. The relation between attachment to the substratum and ingestion by ameba in strychnine sulfate solution and conditioned media. II. Biological assay of conditioned media. Plate 2 339

DAINTY, MARY, KLEINZELLER, ARNOST, LAWRENCE, A. S. C., MIALL, MARGARET, NEEDHAM, JOSEPH, NEEDHAM, DOROTHY M., and SHEN, SHIH-CHANG. Studies on the anomalous viscosity and flow-birefringence of protein solutions. III. Changes in these properties of myosin solutions in relation to adenosinetriphosphate and muscular contraction 355

No. 5, MAY 20, 1944

CROZIER, W. J., and WOLF, ERNST. Theory and measurement of visual mechanisms. XI. On flicker with subdivided fields 401

SOLLNER, KARL, and ANDERMAN, JOAN. The structure of the collodion membrane and its electrical behavior. VIII. Quantitative studies concerning the acidic properties of collodion and their correlation with membrane structure and activity 433

SOLLNER, KARL, and BECK, PAUL W. The structure of the collodion membrane and its electrical behavior. IX. Water uptake and swelling of collodion membranes in aqueous solutions of organic electrolytes and non-electrolytes 451

PAGE

ORMSBEE, RICHARD A., and FISHER, KENNETH C. The effect of urethane on the consumption of oxygen and the rate of cell division in the ciliate *Tetrahymena geleii* 461

FISHER, KENNETH C., and HENRY, R. J. The effects of urethane and chloral hydrate on oxygen consumption and cell division in the egg of the sea urchin, *Arbacia punctulata* 469

No. 6, JULY 20, 1944

PONDER, ERIC. The kinetics of *in vivo* hemolytic systems 483

CROZIER, W. J., and WOLF, ERNST. Theory and measurement of visual mechanisms. XII. On visual duplexity 513

GOLDSTEIN, AVRAM. The mechanism of enzyme-inhibitor-substrate reactions illustrated by the cholinesterase-physostigmine-acetylcholine system 529

INDEX TO VOLUME 27 581
